952SS-208 SPECIFICATIONS
- Pump Volume At Pump Head: 3.8 GPM/228 GPH
- Pump Pressure At Pump Head: 2300 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 6.2
- Machine Voltage: 208Vac/60Hz/1Ph
- Total Machine Amperage: 28 Amps
- Machine Weight: 500 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

969SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.8 GPM/228 GPH
- Pump Pressure At Pump Head: 2300 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 6.2
- Machine Voltage: 575Vac/60Hz/3Ph
- Total Machine Amperage: 7 Amps
- Machine Weight: 495 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

981SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.9 GPM/234 GPH
- Pump Pressure At Pump Head: 2000 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 5.0
- Machine Voltage: 230VAC/60Hz/1Ph
- Total Machine Amperage: 25 Amps
- Machine Weight: 490 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

982SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.9 GPM/234 GPH
- Pump Pressure At Pump Head: 2000 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 5.0
- Machine Voltage: 230Vac/60Hz/3Ph
- Total Machine Amperage: 25 Amps
- Machine Weight: 490 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

991SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.9 GPM/234 GPH
- Pump Pressure At Pump Head: 2000 PSI
- Burner Type: LP Gas Fired, 360,997 BTU/Hr.
- Motor Hp: 5.0
- Machine Voltage: 208Vac/60Hz/3Ph
- Total Machine Amperage: 18 Amps
- Machine Weight: 485 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

992SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.9 GPM/234 GPH
- Pump Pressure At Pump Head: 2000 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 5.0
- Machine Voltage: 208Vac/60Hz/3Ph
- Total Machine Amperage: 18 Amps
- Machine Weight: 485 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

994SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.9 GPM/234 GPH
- Pump Pressure At Pump Head: 2000 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 5.0
- Machine Voltage: 460Vac/60Hz/3Ph
- Total Machine Amperage: 8 Amps
- Machine Weight: 485 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"

995SS SPECIFICATIONS
- Pump Volume At Pump Head: 3.9 GPM/234 GPH
- Pump Pressure At Pump Head: 2000 PSI
- Burner Type: Natural Gas Fired, 364,835 BTU/Hr.
- Motor Hp: 5.0
- Machine Voltage: 460Vac/60Hz/3Ph
- Total Machine Amperage: 8 Amps
- Machine Weight: 485 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=45", Width=18", Height=50"
### 1411SS SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** LP Gas Fired, 360,997 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 230VAC/60Hz/1Ph
- **Total Machine Amperage:** 34 Amps
- **Machine Weight:** 550 Lbs.
- **Shipping Weight:** 610 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1412SS SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** Natural Gas Fired, 364,835 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 230VAC/60Hz/1Ph
- **Total Machine Amperage:** 34 Amps
- **Machine Weight:** 550 Lbs.
- **Shipping Weight:** 610 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1421SS SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** LP Gas Fired, 360,997 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 230VAC/60Hz/3Ph
- **Total Machine Amperage:** 25 Amps
- **Machine Weight:** 545 Lbs.
- **Shipping Weight:** 605 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1421SS-208 SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** LP Gas Fired, 360,997 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 230VAC/60Hz/3Ph
- **Total Machine Amperage:** 24 Amps
- **Machine Weight:** 545 Lbs.
- **Shipping Weight:** 605 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1422SS SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** Natural Gas Fired, 364,835 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 208Vac/60Hz/3Ph
- **Total Machine Amperage:** 24 Amps
- **Machine Weight:** 545 Lbs.
- **Shipping Weight:** 605 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1422SS-208 SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** Natural Gas Fired, 364,835 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 208Vac/60Hz/3Ph
- **Total Machine Amperage:** 24 Amps
- **Machine Weight:** 545 Lbs.
- **Shipping Weight:** 605 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1424SS SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** LP Gas Fired, 360,997 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 460Vac/60Hz/3Ph
- **Total Machine Amperage:** 12 Amps
- **Machine Weight:** 545 Lbs.
- **Shipping Weight:** 605 Lbs.
- **Exhaust Stack Size:** 8"
- **Machine Dimensions:** Length=45", Width=18", Height=50"

### 1424SS-208 SPECIFICATIONS
- **Pump Volume At Pump Head:** 3.9 GPM/234 GPH
- **Pump Pressure At Pump Head:** 3000 PSI
- **Burner Type:** LP Gas Fired, 360,997 BTU/Hr.
- **Motor Hp:** 7.5
- **Machine Voltage:** 460Vac/60Hz/3Ph
- **Total Machine Amperage:** 12 Amps

Model Number ______________________________
Serial Number ______________________________
Date of Purchase ____________________________

The model and serial numbers will be found on a decal attached to the pressure washer. You should record both serial number and date of purchase and keep in a safe place for future reference.
Thank you for purchasing this Pressure Washer.
We reserve the right to make changes at any time without incurring any obligation.

Owner/User Responsibility:
The owner and/or user must have an understanding of the manufacturer’s operating instructions and warnings before using this pressure washer. Warning information should be emphasized and understood. If the operator is not fluent in English, the manufacturer’s instructions and warnings shall be read to and discussed with the operator in the operator’s native language by the purchaser/owner, making sure that the operator comprehends its contents.

Owner and/or user must study and maintain for future reference the manufacturers’ instructions. The operator must know how to stop the machine quickly and understand the operation of all controls. Never permit anyone to operate the engine without proper instructions.

This manual should be considered a permanent part of the machine and should remain with it if machine is resold.

When ordering parts, please specify model and serial number. Use only identical replacement parts.

This machine is to be used only by trained operators.

**IMPORTANT SAFETY INFORMATION**

**WARNING:** To reduce the risk of injury, read operating instructions carefully before using.

1. Read the owner’s manual thoroughly. Failure to follow instructions could cause malfunction of the machine and result in death, serious bodily injury and/or property damage.
2. Know how to stop the machine and bleed pressure quickly. Be thoroughly familiar with the controls.
3. Stay alert — watch what you are doing.
4. Do not replace LP tank while machine is running.
5. All installations must comply with local codes. Contact your electrician, plumber, utility company or the selling distributor for specific details. If your machine is rated 250 volts or less, single phase will be provided with a ground fault circuit interrupter (GFCI). If rated more than 250 volts, or more than single phase this product should only be connected to a power supply receptacle protected by a GFCI.

**DANGER:** Improper connection of the equipment-grounding conductor can result in a risk of electrocution. Check with a qualified electrician or service personnel if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the product - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use any type of adaptor with this product.

**WARNING:** Keep wand, hose, and water spray away from electric wiring or fatal electric shock may result.

6. To protect the operator from electrical shock, the machine must be electrically grounded. It is the responsibility of the owner to connect this machine to a UL grounded receptacle of proper voltage and amperage ratings. Do not spray water on or near electrical components. Do not touch machine with wet hands or while standing in water. Always disconnect power before servicing.

**WARNING:** Flammable liquids can create fumes which can ignite, causing property damage or severe injury.

**WARNING:** Risk of explosion — Operate only where open flame or torch is permitted.

**WARNING:** Risk of fire — Do not change tanks when the product is operating or still hot.

**WARNING:** Use vapor fuel only.

7. Oil burning appliances shall be installed only in locations where combustible dusts and flammable gases or vapors are not present. Do not store or use gasoline near this machine.

8. Keep operating area clear of all persons.

**WARNING:** High pressure spray can cause paint chips or other particles to become airborne and fly at high speeds. To avoid personal injury, eye, hand and foot safety devices must be worn.

9. Eye, hand, and foot protection must be worn when using this equipment.
IMPORTANT SAFETY INFORMATION

WARNING: This machine exceeds 85 db appropriate ear protection must be worn.

CAUTION: Hot discharge fluid. Do not touch or direct discharge stream at persons.
WARNING: This machine produces hot water and must have insulated components attached to protect the operator.

WARNING: Risk of injury. Hot surfaces can cause burns. Use only designated gripping areas of spray gun and wand. Do not place hands or feet on non-insulated areas of the pressure washer.

10. To reduce the risk of injury, close supervision is necessary when a machine is used near children. Do not allow children to operate the pressure washer. This machine must be attended during operation.

WARNING: Grip cleaning wand securely with both hands before starting. Failure to do this could result in injury from a whipping wand.
11. Never make adjustments on machine while in operation.
12. Be certain all quick coupler fittings are secured before using pressure washer.

WARNING: High pressure developed by these machines will cause personal injury or equipment damage. Keep clear of nozzle. Use caution when operating. Do not direct discharge stream at people, or severe injury or death will result.

13. To keep machine in best operating conditions, it is important you protect machine from freezing. Failure to protect machine from freezing could cause malfunction of the machine and result in death, serious bodily injury, and/or property damage. Follow storage instructions specified in this manual.

14. Inlet water must be clean fresh water and no hotter than 90°F.

WARNING: Risk of asphyxiation. Use this product only in a well ventilated area.

15. Avoid installing machines in small areas or near exhaust fans. Adequate oxygen is needed for combustion or dangerous carbon monoxide will result.

16. Manufacturer will not be liable for any changes made to our standard machines or any components not purchased from us.
17. The best insurance against an accident is precaution and knowledge of the machine.

WARNING: Be extremely careful when using a ladder, scaffolding or any other relatively unstable location. The cleaning area should have adequate slopes and drainage to reduce the possibility of a fall due to slippery surfaces.

18. Do not overreach or stand on unstable support. Keep good footing and balance at all times.
19. Do not operate this machine when fatigued or under the influence of alcohol, prescription medications, or drugs.
20. Follow the maintenance instructions specified in the manual.

WARNING: Use vapor fuel only.
21. Do not replace LP tank while machine is running. Serious injury could result.

22. The LP models are designed to run on vapor propane fuel. Do not use liquid fuel. Have a qualified serviceman install and service your equipment.
23. Never expose a spark or flame where there may be unburned gas present.
24. Install the machine 18" above the floor and about 2 feet from wall providing adequate ventilation and space.
25. When making repairs disconnect from electrical source and shut off gas valve.
26. Install this machine on non combustible flooring.
27. Do not allow acids, caustic or abrasive fluids to pass through the pump.
28. Never run pump dry or leave spray gun closed longer than 1-2 minutes.

**WARNING:** If connection is made to portable water supply, a back flow device must be provided.

---

**IMPORTANT SAFETY INFORMATION**

---

*Example Of Down Draft Diverter For Gas Fired Machines*

---

*Follow the maintenance instructions specified in the manual.*
**COMPONENT IDENTIFICATION**

**Pump** — Develops high pressure by pumping water volume through nozzle.

**Spray Gun** — Controls the application of water and detergent onto cleaning surface with trigger device. Includes safety latch.

**Detergent Metering Valve** — Controls detergent mixture.

**Wand** — Must be connected to the spray gun.

**High Pressure Hose** — Connect one end to water pump discharge nipple and the other end to spray gun.

**Pressure Nozzle** — Inserted into wand quick coupler to develop pressure

**Adjustable Thermostat** — Prevents water temperature from exceeding high temperatures. Is not used to maintain constant temperature setting.
ASSEMBLY INSTRUCTIONS

Unpacking
Unpack carefully. Wear safety glasses or goggles while unpacking, assembling or operating pressure washer. If there are missing components or hidden damage immediately contact distributor or carrier concerning discrepancies.
1. Cut strapping band from pressure washer and pallet.
2. Remove pressure washer from pallet.

Parts Included
- Pressure Washer
- Pressure Hose
- Hose Hanger
- Wand
- Wand Holder
- Parts Box Containing:
  ■ Pressure Nozzles (3 ea.)
  ■ Trigger Gun
- Operating Instructions and Parts Manual

Tools Required
- 10" Adjustable Crescent Wrenches (2 ea.)
- Blade Screwdriver

Pressure Hose, Wand and Wand Holder
1. Use teflon tape on plumbing connections to prevent leakage.
2. Install pressure hose on machine as shown.
3. Assemble wand components as shown. Connect pressure hose to trigger gun.
   
   NOTE: The nozzle is not to be installed at this time.

4. Make sure that all plumbing connections are tight.
Getting Started

**IMPORTANT:** Proper initial installation of equipment will assure more satisfactory performance, longer service life and lower maintenance cost.

The pressure washer should be run on a level surface and in a protected area where it is not readily influenced by outside sources such as strong winds, freezing temperatures, rain, etc. The pressure washer should be located to assure easy access for filling of fluids, adjustments and maintenance. Normal precautions should be taken by the operator to prevent moisture from reaching the pressure washer. It is recommended that a partition be made between the wash area and the pressure washer to prevent direct spray from the wand coming in contact with the pressure washer. Moisture reaching the equipment will reduce the pressure washer’s service life. All installations should comply with the local codes covering such installations.

Venting

**WARNING - RISK OF EXPLOSION:** Do not spray flammable liquids or operate machine in areas where flammable vapors are present. Operate only where open flame or torch is permitted.

**CAUTION - RISK OF ASPHYXIATION:** Do not run machine indoors or in an enclosed area without the required venting, as exhaust fumes may be hazardous to your health.

**CAUTION:** Some gases are heavier than air and will spill out on the floor in the 2 to 3 minutes required for the safety pilot valve to close off gas supply. Therefore, always provide adequate space and ventilation around these units.

**IMPORTANT:** A draft diverter shall be installed. **INSTALLER UNE HOTTE DE TIRAGE.**

**IMPORTANT:** All venting must be in accordance with applicable federal and state laws, and local ordinances. Consult local heating contractors.

**IMPORTANT:** Not suitable for connection to Type B gas vent if the stack temperature exceeds 243°C (470°F).

If the pressure washer is to be used in an enclosed area, a flue must be installed to vent burner exhaust to the outside atmosphere. Exhaust gases should not be vented into a wall, a ceiling, or into a concealed space in a building. Be sure the flue is the same size as the burner exhaust vent on the pressure washer. Poor draft will cause the pressure washer to soot and not operate properly. When selecting the location for installation, beware of poorly ventilated locations or areas where exhaust fans may cause an insufficient supply of oxygen. Proper combustion can only be obtained when there is a sufficient supply of oxygen available for the amount of fuel being burned. If it is necessary to install the machine in a poorly ventilated area, outside fresh air may have to be piped to the burner and a fan installed to bring sufficient air into the machine. Locate the pressure washer so that the flue will be as straight as possible and protrude through the roof at a proper height and location to provide adequate draft. This gas fired pressure washer must have a draft diverter installed in the flue. A draft diverter will permit proper upward flow of exhaust flue gases.

Hotsy natural and LP gas series pressure washers that incorporate a natural draft burner assembly designed to heat water that comes from the pressure washer pump require a draft diverter and vent pipe for exhausting to the outside. This operator’s manual indicates this machine is to be vented through the ceiling using straight pipe or 45° elbows. It also discourages the use of any 90° venting elbows which restrict air flow through the burner causing poor burner conditions. If this machine is going to be installed to a 90° or extended exhaust vent run length which may restrict air flow it is recommended that a contractor install a power vent. When a contractor has found it impossible to vent through the ceiling then power venting can be calculated to help eliminate exhaust restriction on this natural draft machine. This draft inducer (power vent) must be installed by a licensed contractor who can calculate size, operation connections and associated dampeners. Hotsy is not a licensed contractor and as such we are unable to make recommendations for suitable make and model of power vents.

It is important that the licensed contractor consult local building codes. Hotsy can only make recommendations and the selection of the venting must take into account the type of roof or wall material it contacts which could change the vent requirement for compliance with local building codes

Water Supply

Connect water supply hose to water inlet. The water faucet and supply hose must be capable of providing a minimum of 6.0 gallons per minute (GPM).

Fuel Supply

**CAUTION:** Have a qualified gas serviceman install and service your equipment.

**WARNING:** Gas line supply pressure must not exceed 14 water column inches (.50 PSI).

**IMPORTANT:** Gas line must be provided with a shut off valve.

**IMPORTANT:** The gas supply must be able to supply a minimum of 525,000 BTU/HR at the machines rated manifold pressure.

Consult building codes for installation requirements. For proper and safe machine operation, we recommend that a licensed contractor be consulted for machine installation.
**INSTALLATION INSTRUCTIONS**

**Natural / Propane Gas**
Have a qualified gas serviceman install the natural gas fuel supply line to the machine.

**Gas Valve**
The ideal incoming gas pressure is 11 w.c.i. (water column inches) minimum 6 w.c.i., maximum 14 w.c.i. or 1/2 psig. The correct operating manifold pressure for natural gas is 3.5 w.c.i. The operating manifold pressure for propane gas is 11 w.c.i. The gas valve pressure regulator can be adjusted between 3 and 4 w.c.i. natural gas or 6 and 11 w.c.i. for propane.

The gas pressure coming out of the regulator and going to the burner ring has been factory set for elevations of 0 to 2000 ft. Altitudes greater than 2000 ft will require adjustments to the gas manifold pressures. Consult your local service dealer/distributor for high altitude adjustments. In Canada, certification for installation at altitudes over 4500 feet above sea level is the jurisdiction of local authorities. You should not readjust the burner ring gas pressure. If you replace your gas valve, you will need to adjust the new valve. Refer to your machine’s specification plate for the correct pressure setting. Follow the installation and adjustment instructions provided with your replacement valve.

**NOTE:** Air for combustion and ventilation along with exhaust flue sizing must conform to methods outlined in current American Standard (ANSI-Z223.1) National Fuel Gas Code or National Standard of Canada CSA-149.1 and CSA-149.2 "Installation Code for Gas Burning Appliances".

**Electrical**

**WARNING:** Make sure all switches and controls are in the OFF position prior to connecting electrical supply.

**WARNING:** DO NOT stand in water while connecting and disconnecting electrical supply.

**WARNING:** Always disconnect power before servicing your pressure washer.

**IMPORTANT:** Consult local building codes for exact electrical requirements. Licensed contractors may be required.

**IMPORTANT:** All wiring must be of proper voltage and amperage rating and conform to applicable codes.

**IMPORTANT:** This machine must be electrically grounded. LA MACHINE DOIT ÊTRE MISE À LA TERRE.

**Grounding Instructions:** Make sure all switches and controls are in the OFF position prior to connecting electrical supply. Do not stand in water while connecting and disconnecting electrical supply. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. The product must be connected to an appropriate power source that is properly installed and grounded in accordance with all local codes and ordinances.

**DANGER:** Improper connection of the equipment grounding conductor can result in a risk of electrocution. Check with a qualified electrician or service personnel if you are in doubt as to whether the outlet is properly grounded.

**Extension Cords:** Do not use extension cords with this equipment.

**WARNING:** To reduce the risk of electrocution, keep all connections dry and off the ground.
OPERATION INSTRUCTIONS

Before Starting

1. Read all manuals provided with this pressure washer. Become familiar with location and function of all operating and safety controls.

WARNING: Check hoses, fittings, wand, trigger gun and fuel connections daily for signs of wear, cracks and looseness, and replace as required.

2. Connect water supply hose to the standard garden hose connector. The water faucet and supply hose must be capable of providing 6.0 GPM.

3. This machine was factory built for Natural Gas. See instructions under Fuel Supply.

4. Check pump oil level.

5. If detergents are to be used, only use detergents intended for pressure washers. Follow instructions on the detergent container.

IMPORTANT: Before installing pressure nozzle on initial start-up, turn on the water supply, start the pump by pressing the pump ON switch, and hold the wand trigger open until water appears at the end of the wand. Allow water to run from the end of the Wand until clear to prevent the nozzle from clogging.

IMPORTANT: If the pressure washer has not been used for an extended period of time, remove the pressure nozzle from the end of the wand and turn on water supply, and start the pump by pressing the pump ON switch. Hold the wand trigger open and allow water to run from the end of the wand until clear.

6. Install the pressure nozzle on end of wand, refer to illustration below.

7. If you are running the machine for the first time, or have performed maintenance on the burner assembly, there will be air in the gas line. To bleed the air from the gas line run the pressure washer with both pump and burner switches on and thermostat on highest setting. Squeeze the trigger of the trigger gun for 15 seconds. If the burner has not ignited, release the trigger for 5 seconds, then squeeze for 15 seconds. If the burner has not ignited after 10 tries, see the Troubleshooting Guide in this manual.

CAUTION: Have a qualified gas serviceman install and service your equipment.

DANGER: Never expose a spark or flame where there may be unburned gas present.

DANGER: Some gases are heavier than air and will spill out on the floor in the 2 to 3 minutes required for the safety pilot valve to close off gas supply. Therefore, always provide adequate space and ventilation around these units.

To Start

WARNING: Risk of injection or severe injury - Keep clear of nozzle - DO NOT direct discharge stream at persons - This machine is to be used only by qualified operators.

AVERTISSEMENT: RISQUE D’INJECTION ET DE BLESSURES GRAVES. SE TENIR À L’ÉCART DU JET. NE PAS DIRIGER LE JET DE SORTIE VERS D’AUTRES PERSONNES. CONFIER L’UTILISATION DE CE MATÉRIEL À UN OPÉRATEUR QUALIFIÉ.

WARNING: Wear eye, ear, hand, foot and skin protection at all times while operating pressure washer.

WARNING: Before changing pressure nozzle, engage manual trigger gun lock.

IMPORTANT: The water must be turned on before starting. Running the pump dry will cause damage and void warranty.

IMPORTANT: Do not allow the machine to run with trigger of the trigger gun released for more than 10 minutes at any one time or damage to pump may occur.

1. Turn ON water supply.

2. Turn ON gas supply.

3. Hold wand firmly, release trigger of trigger gun and turn pump switch ON. Squeeze trigger of trigger gun and allow air to purge from system.

4. If HOT water is desired, adjust the thermostat to the proper temperature and turn burner switch ON. Squeeze trigger of trigger gun. The pilot will automatically light, quickly followed by the firing of the burner ring. When the trigger of the trigger gun is released or when the thermostat temperature setting is reached, the burner will automatically turn off.

IMPORTANT: If ignition or flame failure is experienced, discontinue use of pressure washer at once. Turn off burner and shut off fuel supply. Have cause of failure corrected by an authorized service technician before use of pressure washer is continued.
To Clean

**WARNING:** Risk of injection or severe injury - Keep clear of nozzle - DO NOT direct discharge stream at persons - This machine is to be used only by qualified operators.

**AVERTISSEMENT:** RISQUE D’INJECTION ET DE BLESSURES GRAVES. SE TENIR À L’ÉCART DU JET. NE PAS DIRIGER LE JET DE SORTIE VERS D'AUTRES PERSONNES. CONFIER L’UTILISATION DE CE MATÉRIEL À UN OPÉRATEUR QUALIFIÉ.

1. Insert detergent inlet line into container of mixed detergent. Open detergent ON/OFF valve. The detergent will be pulled automatically into the system. Allow detergent to reach end of wand before proceeding to step 3.

2. Select pressure nozzle with spray pattern that matches your cleaning needs. Engage manual trigger lock and install selected nozzle.

3. Wash from the bottom to the top, using side to side motions. This washes away heavy dirt and allows the detergent to soak as you work toward the top.

4. Do not wash at a 90° angle to the work (straight at it). This will allow water to splash back at you and reduces your cleaning power. Wash at a 30° to 60° angle to the work. This will allow the water to splash away from you and the water will wash the dirt away faster and easier.

5. Use the width of the spray pattern to wash in a wide path. Overlap spray paths for complete coverage. Wash from side to side, using slow, steady motions.

6. The nozzle should be 12" to 24" from work, closer for tough areas. Be careful on painted or delicate surfaces, the pressure may damage surface if nozzle is too close.

7. Small parts should be washed in a basket and larger, lightweight parts should be clamped down so the pressure does not push them away.

8. Close the detergent ON/OFF valve to permit rinse. Always rinse with cold water after using detergents. Rinse from the top to the bottom to prevent detergent from dripping onto a rinsed area. For the best results, contact your Hotsy dealer to help you select the best detergent for your application.
SHUTDOWN INSTRUCTIONS

To Stop
1. If detergents were used, draw clear water through the detergent line to purge detergent. Failure to do so may clog detergent injector valve.
2. If burner was used, turn OFF burner switch and allow pump to run cold water through coil for several minutes.
3. Turn pump switch OFF.
4. Turn water supply OFF.
5. Squeeze trigger gun open to relieve system pressure.
6. Depress gas control knob slightly and turn to OFF position.
7. Turn off main shut-off valve on gas supply.

STORAGE INSTRUCTIONS

DANGER: Do not store flammable liquids (gasoline, diesel fuel, petroleum, solvents, etc.) near pressure washer, or in non-ventilated areas.

IMPORTANT: Machine must be stored indoors.

1. Protect from freezing by storing in a heated area, or by flushing the system with antifreeze (use an automotive engine antifreeze or windshield washer solvent to antifreeze). To flush the system fill the float tank with antifreeze and remove pressure nozzle from wand. Start the machine and allow it to run until antifreeze runs from the end of the wand. Place wand into float tank and circulate the solution through system for several minutes. Open and close the trigger gun several times to circulate antifreeze through the unloader valve system. Also draw antifreeze through the detergent inlet line to antifreeze the detergent system. For added protection after antifreezing, disconnect the pressure hose from machine and remove the coil drain plug (refer to Component Identification illustration for location). After coil has drained, replace pressure hose and coil drain plug. If the pressure washer is not to be used for an extended length of time, it is recommended that the system be flushed with antifreeze for rust protection.
**WARNING:** Unauthorized machine modification or use of non-approved replacement parts may cause personal injury and/or property damage and will void the manufacturer warranty.

**Pump**

Use Hotsy Pump Oil P/N 315068 for pump crankcase. Crankcase must be filled to the full mark on the dipstick or to center of sight glass window found on the rear of the pump. During the break-in-period, make sure the oil is changed after the first 25 hours of operation. After that, replace oil every 3 months or 300 hours of operation, whichever comes first.

**Proper Pump Care:**
- Do not pump acids.
- Do not allow pump to run dry.
- Winterize if storing in freezing temperatures; refer to **Storage** for details.
- Use a water softener on the water system if known to be high in mineral content.
- Use only high quality detergents and follow manufacturer’s mix recommendations.
- Flush the system with clear water immediately after using detergent solutions.
- Clean filter screen on detergent inlet line periodically.
- Flush the pressure washer system with antifreeze if storing for an extended period of time; refer to **Storage** for details.

**Pump Motor**

On a yearly basis, oil pump motor per instructions on motor nameplate.

**NOTE:** Some motors may be equipped with permanently lubricated bearings and will not require additional lubrication.

**Gas Burner**

It is recommended that the gas burner be serviced yearly or as needed. Contact your local service center.

**Relief Valve**

**WARNING:** The relief valve on this pressure washer has been factory set and sealed and is a field nonadjustable part. Tampering with the factory setting may cause personal injury and/or property damage, and will void the manufacturer warranty.

**Unloader Valve**

**WARNING:** The unloader valve on this pressure washer has been factory set and sealed and is a field nonadjustable part. Tampering with the factory setting may cause personal injury and/or property damage, and will void the manufacturer warranty.

**Heating Coil**

**Coil Descaling:** In hard water areas, scale buildup within the heating coil will occur. Scale deposits will decrease the water temperature rise and may eventually clog the heating coil. Contact your local service center when descaling is needed.

**Coil Desooting:** Poor grades of fuel oil or inadequate combustion air will cause heavy soot buildup on the outside surface of the heating coil. These deposits will insulate the coil. This will restrict the air flow through the coil, further aggravating the soot buildup. Contact your local service center when desooting is needed.
## Troubleshooting Guide

HOTSY LIMITED NEW PRODUCT WARRANTY
PRESSURE WASHERS

WHAT THIS WARRANTY COVERS

All Hotsy pressure washers are warranted by Hotsy to the original purchaser to be free from defects in materials and workmanship under normal use, for the periods specified below. This Limited Warranty is subject to the exclusions shown below, is calculated from the date of the original purchase, and applies to the original components only. Any parts replaced under this warranty will assume the remainder of the part’s warranty period.

SEVEN YEAR PARTS AND ONE YEAR LABOR WARRANTY:

Components manufactured by Hotsy, such as frames, handles, top and bottom wraps, float tanks, fuel tanks, belt guards, and internal components on the oil-end of HOTSY manufactured pumps. General, AR, Liberty, Comet and swash and wobble plate pumps have a one year warranty. Heating coils have a five year warranty from date of original machine purchase.

ONE YEAR PARTS AND ONE YEAR LABOR WARRANTY:

All other components, excluding normal wear items as described below, will be warranted for one year on parts and labor. Parts and labor warranty on these parts will be for one year regardless of the duration of the original component manufacturer’s part warranty.

WARRANTY PROVIDED BY OTHER MANUFACTURERS:

Motors, generators, and engines, which are warranted by their respective manufacturers, are serviced through these manufacturers’ local authorized service centers. Hotsy is not authorized and has no responsibility to provide warranty service for such components.

WHAT THIS WARRANTY DOES NOT COVER

This warranty does not cover the following items:

1. Normal wear items, such as nozzles, spray guns, discharge hoses, wands, quick couplers, seals, filters, gaskets, O-rings, packings, pistons, pump valve assemblies, strainers, belts, brushes, rupture disks, fuses, pump protectors.
2. Damage or malfunctions resulting from accidents, abuse, modifications, alterations, incorrect installation, improper servicing, failure to follow manufacturer’s maintenance instructions, or use of the equipment beyond its stated usage specifications as contained in the operator’s manual.
3. Damage due to freezing, chemical deterioration, scale build up, rust, corrosion, or thermal expansion.
4. Damage to components from fluctuations in electrical or water supply.
5. Normal maintenance service, including adjustments, fuel system cleaning, and clearing of obstructions.
6. Transportation to service center, field labor charges, or freight damage.

WHAT YOU MUST DO TO OBTAIN WARRANTY SERVICE

In order to obtain warranty service on items warranted by Hotsy, you must return the product to your Authorized Hotsy Distributor, freight prepaid, with proof of purchase, within the applicable warranty period. If the product is permanently installed, you must notify your Authorized Hotsy Distributor of the defect. Your Authorized Hotsy Distributor will file a claim with Hotsy, who must subsequently verify the defect. In most cases, the part must be returned to Hotsy freight prepaid with the claim. For warranty service on components warranted by other manufacturer’s, your Authorized Hotsy Distributor can help you obtain warranty service through these manufacturers’ local authorized service centers.

LIMITATION OF LIABILITY

Hotsy’s liability for special, incidental, or consequential damages is expressly disclaimed. In no event shall Hotsy’s liability exceed the purchase price of the product in question. Hotsy makes every effort to ensure that all illustrations and specifications are correct, however, these do not imply a warranty that the product is merchantable or fit for a particular purpose, or that the product will actually conform to the illustrations and specifications. Our obligation under this warranty is expressly limited at our option to the replacement or repair at a service facility or factory designated by us, of such part or parts as inspection shall disclose to have neen defective. THE WARRANTY CONTAINED HEREIN IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. Hotsy does not authorize any other party, including authorized Hotsy Distributors, to make any representation or promise on behalf of Hotsy, or to modify the terms, conditions, or limitations in any way. It is the buyer’s responsibility to ensure that the installation and use of Hotsy products conforms to local codes. While Hotsy attempts to assure that its products meet national codes, it cannot be responsible for how the customer chooses to use or install the product. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.
