Thank you for purchasing a Hotsy Pressure Washer. This manual covers the operation and maintenance of your pressure washer. All information in this manual is based on the latest product information available at the time of printing. Hotsy, Inc. reserves the right to make changes at any time without incurring any obligation.

Read instructions carefully before attempting to assemble, install, operate or service this pressure washer. Failure to comply with instructions could result in personal injury and/or property damage!
871SS SPECIFICATIONS

- Pump Volume At Pump Head: 2.71 GPM/162.6 GPH
- Pump Pressure At Pump Head: 2400 PSI
- Burner Type: Fuel Oil Fired, 248,500 BTU/Hr.
- Burner Fuel Pressure: 140 PSI
- Machine Model: Robin Subaru 211cc, Manual Start
- Machine Weight: 291 Lbs.
- Shipping Weight: 330 Lbs.
- Exhaust Stack Size: 8"
- Machine Dimensions: Length=48", Width=27", Height=42.5"

Model Number ______________________________
Serial Number ______________________________
Date of Purchase ____________________________

The model and serial numbers will be found on a decal attached to the pressure washer. You should record both serial number and date of purchase and keep in a safe place for future reference.
Thank you for purchasing this Pressure Washer.
We reserve the right to make changes at any time without incurring any obligation.

**Owner/User Responsibility:**
The owner and/or user must have an understanding of the manufacturer's operating instructions and warnings before using this pressure washer. Warning information should be emphasized and understood. If the operator is not fluent in English, the manufacturer's instructions and warnings shall be read to and discussed with the operator in the operator's native language by the purchaser/owner, making sure that the operator comprehends its contents.

Owner and/or user must study and maintain for future reference the manufacturers' instructions.

The operator must know how to stop the machine quickly and understand the operation of all controls.

Never permit anyone to operate the engine without proper instructions.

This manual should be considered a permanent part of the machine and should remain with it if machine is resold.

When ordering parts, please specify model and serial number. Use only identical replacement parts.

This machine is to be used only by trained operators.

**IMPORTANT SAFETY INFORMATION**

**WARNING:** To reduce the risk of injury, read operating instructions carefully before using.

1. Read the owner's manual thoroughly. Failure to follow instructions could cause malfunction of the machine and result in death, serious bodily injury and/or property damage.
2. Know how to stop the machine and bleed pressure quickly. Be thoroughly familiar with the controls.
3. Stay alert — watch what you are doing.

**WARNING:** Keep wand, hose, and water spray away from electric wiring or fatal electric shock may result.

4. All installations must comply with local codes. Contact your electrician, plumber, utility company or the selling distributor for specific details.

**WARNING:** Flammable liquids can create fumes which can ignite, causing property damage or severe injury.

**WARNING:** Risk of explosion — Operate only where open flame or torch is permitted.

**WARNING:** Risk of fire — Do not add fuel when the product is operating or still hot.

**WARNING:** Do not use gasoline crankcase draining or oil containing gasoline, solvents or alcohol. Doing so will result in fire and/or explosion.

**WARNING:** Risk of fire — Do not spray flammable liquids.

**WARNING:** This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm. Operation of this equipment may create sparks that can start fires around dry vegetation. A spark arrester may be required. The operator should contact: Local fire agencies for laws or regulations relating to fire prevention requirements.

7. Allow engine to cool for 1-2 minutes before refueling. If any fuel is spilled, make sure the area is dry before testing the spark plug or starting the engine. (Fire and/or explosion may occur if this is not done.)
**IMPORTANT SAFETY INFORMATION**

Gasoline engines on mobile or portable equipment shall be refueled:

a. outdoors;

b. with the engine on the equipment stopped;

c. with no source of ignition within 10 feet of the dispensing point; and

d. with an allowance made for expansion of the fuel should the equipment be exposed to a higher ambient temperature.

In an overfilling situation, additional precautions are necessary to ensure that the situation is handled in a safe manner.

**WARNING: Risk of injury. Disconnect battery ground terminal before servicing.**

8. When in use, do not place machine near flammable objects as the engine is hot.

9. Oil burning appliances shall be installed only in locations where combustible dusts and flammable gases or vapors are not present. Do not store or use gasoline near this machine.

10. Use No. 1 or No. 2 heating oil (ASTM D306) only. **NEVER** use gasoline in your fuel oil tank. Gasoline is more combustible than fuel oil and could result in a serious explosion. **NEVER** use crankcase or waste oil in your burner. Fuel unit malfunction could result from contamination.

11. Do not confuse gasoline and fuel oil tanks. Keep proper fuel in proper tank.

**WARNING: Risk of injury. Hot surfaces can cause burns. Use only designated gripping areas of spray gun and wand. Do not place hands or feet on non-insulated areas of the pressure washer.**

12. Transport/Repair with fuel tank EMPTY or with fuel shut-off valve OFF.

**CAUTION: Hot discharge fluid. Do not touch or direct discharge stream at persons.**

**WARNING: This machine produces hot water and must have insulated components attached to protect the operator.**

13. To reduce the risk of injury, close supervision is necessary when a machine is used near children. Do not allow children to operate the pressure washer. **This machine must be attended during operation.**

14. Never make adjustments on machine while in operation.

**WARNING: Grip cleaning wand securely with both hands before starting. Failure to do this could result in injury from a whipping wand.**

15. Be certain all quick coupler fittings are secured before using pressure washer.

**WARNING: High pressure developed by these machines will cause personal injury or equipment damage. Keep clear of nozzle. Use caution when operating. Do not direct discharge stream at people, or severe injury or death will result.**

**WARNING: Protect machine from freezing.**

16. To keep machine in best operating conditions, it is important you protect machine from freezing. Failure to protect machine from freezing could cause malfunction of the machine and result in death, serious bodily injury, and/or property damage. Follow storage instructions specified in this manual.

17. Inlet water must be clean fresh water and no hotter than 90°F.

**WARNING: Risk of asphyxiation. Use this product only in a well ventilated area.**

18. Avoid installing machines in small areas or near exhaust fans. Adequate oxygen is needed for combustion or dangerous carbon monoxide will result.

19. Manufacturer will not be liable for any changes made to our standard machines or any components not purchased from us.

20. The best insurance against an accident is precaution and knowledge of the machine.
重要安全信息

警告：在使用梯子、脚手架或其他任何相对不稳定的地点时，要极其小心。清洁区域应有充分的斜坡和排水，以减少由于滑溜表面而发生坠落的可能。

21. 不要让酸、碱性或研磨性液体通过泵。
22. 请勿让泵干运转或使喷枪长时间保持关闭状态，超过1-2分钟。
23. 带有关断喷枪的机器不应长时间处于喷枪关闭状态，因为这可能会对泵造成损坏。
24. 保护排水软管免受车辆和尖锐物体的损害。软管在使用前应检查，否则可能会导致人身伤害。
25. 在断开排水软管与水源的连接前，请关闭燃烧器并打开喷枪，使水冷却至100°F以下再停止机器。然后打开喷枪以释放压力。未正确冷却或不保持加热管可能会导致蒸汽爆炸。
26. 不要过分伸展或站在不稳固的支撑上。保持良好的脚踏感和平衡。
27. 不要在疲劳或受酒精、处方药或毒品的影响时操作此机器。
28. 对于油加热型机器，只使用煤油、No.1家用取暖油或柴油。如果使用柴油，请在每加仑中加入一种去污剂。

遵循手册中规定的维护说明。
**COMPONENT IDENTIFICATION**

- **Pump** — Delivers a specific gpm to the high pressure nozzle which develops pressure.
- **Spray Gun** — Controls the application of water and detergent onto cleaning surface with trigger device. Includes safety latch.
- **Wand** — Must be connected to the spray gun.
- **High Pressure Hose** — Connect one end to water pump high pressure discharge nipple and the other end to spray gun.
- **Unloader Valve** — Safety device which, when the spray gun closes, prevents over pressurization.
ASSEMBLY INSTRUCTIONS

Unpacking
Unpack carefully. Wear safety glasses or goggles while unpacking, assembling, or operating pressure washer. If there are missing components or hidden damage, immediately contact carrier concerning discrepancies.
1. Cut strapping band from pressure washer and pallet.
2. Remove pressure washer from pallet.

Parts Included
• Pressure Washer
• Pressure Hose
• Wand
• Operating Instructions and Parts Manual
• Gasoline Engine Manual
• Parts Bag Containing:
  ■ Pressure Nozzles (3 Ea.)
  ■ Quick Disconnects (2 Ea.)
  ■ Quick Disconnect Plug
  ■ Trigger Gun

Tools Required
• 8” Adjustable Wrench
• Teflon Tape
• Flat Blade Screwdriver

Pressure Hose, Trigger Gun and Wand
1. When assembling, use teflon tape on all threaded plumbing connections to prevent leakage.
2. Install the pressure hose on the pressure washer as shown in Figure 1.
3. Assemble wand components as shown in Figure 2.
4. Make sure all plumbing connections are tight.

NOTE: The pressure nozzle is not to be installed at this time.

Figure 1 - Pressure Hose Installation

Figure 2 - Wand Component Installation
Getting Started

IMPORTANT: Proper initial installation of equipment will assure more satisfactory performance, longer service life, and lower maintenance cost.

IMPORTANT: The use of a backflow preventer on the water supply hose is recommended and may be required by local code.

The pressure washer should be run on a level surface and in a protected area where it is not readily influenced by outside forces such as strong winds, freezing temperatures, rain, etc. The pressure washer should be located to assure easy access for filling of fluids, adjustments and maintenance. Normal precautions should be taken by the operator to prevent moisture from reaching the pressure washer. It is recommended that a partition be made between the wash area and the pressure washer to prevent direct spray from the wand from coming in contact with the pressure washer. Moisture reaching the equipment will reduce the pressure washer’s service life. All installations must comply with the local codes covering such installations.

Venting

DANGER: DO NOT run machine indoors or in an enclosed area, as exhaust fumes may be hazardous to your health.

DANGER: DO NOT operate machine in areas where flammable vapors (gasoline, solvents, etc.) may be present, as this machine may ignite the vapors.

CAUTION: All venting must be in accordance with applicable federal and state laws, and local ordinances. Consult local heating contractors.

If the pressure washer is to be used in an enclosed area, a flue must be installed to vent burner and engine exhaust to the outside atmosphere. Be sure the flue is the same size as the burner exhaust vent on the pressure washer. See Figure 1 for location. Poor draft will cause the pressure washer to soot and not operate properly. When selecting the location for installation, beware of poorly ventilated locations or areas where exhaust fans may cause an insufficient supply of oxygen. Proper combustion can only be obtained when there is a sufficient supply of oxygen available for the amount of fuel being burned. If it is necessary to install the machine in a poorly ventilated area, outside fresh air may have to be piped to the burner and a fan installed to bring sufficient air into the machine. Locate the pressure washer so that the flue will be as straight as possible and protrude through the roof at a proper height and location to provide adequate draft. This oil fired pressure washer must have a draft regulator installed in the flue (available from most heating contractors). A draft regulator will permit proper upward flow of exhaust flue gases.

In addition, the pressure washer should never be operated in an enclosed area where high ambient temperatures exist. High ambient temperatures (above 100° F) can cause engine oil failure and will greatly reduce the engine’s performance.

Gasoline Engine

The gasoline engine is preset for operation at altitudes below 1000 feet above sea level. If operated at higher altitudes, it may be necessary to install a high altitude main jet in the carburetor. Contact an authorized engine sales and service center for details.

Pre-Operation Check

- Pump Oil (SAE 30W non-detergent oil)
- Cold Water Supply (3.5 gpm • 5/8” • 20 psi)
- Hose, wand, nozzles (nozzle size per serial plate)
- Water filter (intact, nonrestrictive)
- Engine fuel (unleaded 86 or higher)
- Engine oil (SAE 10W40)
- Burner fuel (No. 1 or No.2 home heating fuel or diesel)
Oil Burner

**Burner Air Adjustment:** The oil burner on this machine is preset for operation at altitudes below 1000 feet. If operated at higher altitudes, it may be necessary to adjust the air shutter and air band setting. Adjust the air shutter for a #1 or #2 smoke spot on the Bacharach scale.

To adjust, start machine and turn burner ON. Loosen two locking screws found in the air shutter openings and close air shutter until black smoke appears from burner exhaust vent. Note air shutter position. Next, slowly open the air shutter until white smoke just starts to appear. Turn air shutter halfway back to the black smoke position previously noted. Tighten locking screws.

**CAUTION:** If white smoke appears from burner exhaust vent during start-up or operation, discontinue use and readjust air bands.

**NOTE:** If a flue is installed, have a professional serviceman adjust your burner for a #1 or #2 smoke spot on the Bacharach scale.
OPERATION INSTRUCTIONS

Before Starting

1. Read all manuals provided with this pressure washer. Become familiar with location and function of all operating and safety controls.

WARNING: Check hoses, fittings, wand, trigger gun and fuel connections daily for signs of wear, cracks and looseness, and replace as required.

2. Connect water supply hose to the garden hose connector located on pump. The water faucet and supply hose must be capable of providing a minimum of 3.5 gallons per minute (GPM).

3. Fill oil burner fuel tank. Use kerosene, #1 grade home heating oil, #1 or #2 diesel fuel. DO NOT USE GASOLINE, CRANKCASE OIL DRAININGS, OR WASTE OIL.

WARNING: DO NOT fill engine fuel tank while engine is running or hot. Let engine cool before refueling or spontaneous fire may result. Fuel spillage or vapors could ignite if engine is hot.

4. Fill the engine fuel tank. Do not overfill, fill to the bottom of filler neck only. Use lead free gasoline minimum 86 octane. DO NOT use gasoline containing more than 15% MTBE, 5% methanol or 10% ethanol. Refer to the provided gasoline engine manual for additional details.

5. Check pump and engine oil levels.

6. If detergents are to be used, only use detergents intended for pressure washers. Follow instructions on the detergent container.

IMPORTANT: Before installing pressure nozzle on initial start-up, turn on the water supply and allow water to run from the end of the wand until clear to prevent the pressure nozzle from clogging.

IMPORTANT: If the pressure washer has not been used for an extended period of time, remove the pressure nozzle from the end of the wand and turn on water supply. Allow water to run from the end of the wand until clear.

7. Install the proper pressure nozzle for your cleaning needs on the end of wand, refer to Figure 4.

IMPORTANT: The trigger gun provided with this pressure washer is equipped with a manual trigger lock to prevent accidental operation of the trigger gun. (Refer to Figure 4) The manual trigger lock should be used whenever the trigger gun is not in use.

To Start

DANGER: DO NOT point wand or trigger gun at yourself or at any person. Bodily injury may result from water under high pressure.

WARNING: Wear eye, ear, hand, foot and skin protection at all times while operating pressure washer.

IMPORTANT: The water must be turned on before starting. Running the pump dry will cause damage and void warranty.

IMPORTANT: DO NOT allow the machine to run with trigger of the trigger gun released for more than 10 minutes at any one time or damage to pump may occur.

1. Turn ON water supply.

3. Place engine ON/OFF switch in the ON position.

4. Open fuel shutoff valve (if so equipped). Move choke lever to FULL CHOKE position, (choke may not be needed on warm engine). Move throttle lever to HALF THROTTLE position.

5. Pull the rope starter slowly until resistance is felt, then pull briskly. Do not allow the rope starter to snap back against the engine. Return it gently to prevent damage to the starter.

6. When the engine starts, move choke lever until engine runs smoothly. When engine warms, move choke lever to NO CHOKE position. Move throttle lever to FULL THROTTLE position.

IMPORTANT: To allow for proper burner operation, the throttle control must be kept in the full throttle position during operation.

NOTE: If engine fails to start, refer to Troubleshooting Guide in this manual.

7. Squeeze trigger of trigger gun and allow air to purge from system.

8. If HOT water is desired, adjust the thermostat to the proper temperature and turn burner switch ON. The burner will light immediately with a small puff of smoke. You may need to initially adjust your burner for peak performance. See Oil Burner section under Installation. If smoke continues, contact Customer Service at 1-303-792-5200. When the trigger of the trigger gun is released or when the thermostat temperature setting is reached, the burner will automatically turn off.
OPERATION INSTRUCTIONS

To Clean

**DANGER: DO NOT place hands or fingers in front of high pressure spray. Bodily injury may result.**

The detergent injector valve operates by reducing the volume of water, thus a vacuum is achieved and detergent is drawn into the system. **DO NOT** reduce the water inlet flow so the pump cavitates due to water starvation. Operating a pump with insufficient water will damage the pump seals.

1. Insert detergent inlet line into container of mixed detergent.
2. Completely open detergent control knob located on the side of the detergent injector valve. Refer to Figure 5.
3. Start the detergent suction by rotating the water adjustment knob of the detergent injector valve. Refer to Figure 6. Turning the knob counterclockwise will pull detergent into the system. The flow may be observed through the clear detergent line. Secure the knob position with the knurled nut.
4. The side detergent control knob can now be adjusted to meter the desired amount of detergent.
5. Wash from the bottom to the top, using side to side motions. This washes away heavy dirt and allows the detergent to soak as you work toward the top.
6. Do not wash at a 90° angle to the work (straight at it). This will allow water to splash back at you and reduces your cleaning power. Wash at a 30° to 60° angle to the work. This will allow the water to splash away from you and the water will wash the dirt away faster and easier.
7. Use the width of the spray pattern to wash in a wide path. Overlap spray paths for complete coverage washing from side to side, using slow, steady motions.
8. The nozzle should be 12” to 24” from work, closer for tough areas. Be careful on painted or delicate surfaces, the pressure may damage surface if nozzle is too close.
9. Small parts should be washed in a basket so the pressure does not push them away. Larger, lightweight parts should be clamped down so the pressure does not push them away.
10. Turn the side detergent control knob clockwise (CW) for detergent decrease. Wait for detergent to clear. Always rinse with cold water after using detergent. Rinse from the top to the bottom to prevent detergent from dripping onto a rinsed area. For the best results, contact your Hotsy dealer to help you select the best detergent for your application.

To Stop

1. If detergents were used, draw clear water through the detergent inlet line to purge detergent. Failure to do so may clog detergent injector valve.
2. If burner was used, turn OFF burner switch and allow pump to run cold water through coil for several minutes.
3. Move throttle lever to idle position.
4. Turn engine ON/OFF switch to the OFF position.
5. Close fuel shutoff valve (if so equipped).
6. Turn water supply OFF.
7. Squeeze trigger of trigger gun to relieve system pressure.

Storage

**DANGER: DO NOT store flammable liquids (gasoline, diesel fuel, solvents, etc.) near pressure washer, or in non-ventilated areas.**

Protect from freezing by storing in a heated area, or by flushing the system with antifreeze (use an automotive engine antifreeze or windshield washer solvent to antifreeze). To flush the system with antifreeze, the following steps are to be followed:
1. Connect the water supply hose to the garden hose connector located on the pump. Turn on water supply.
2. Place the detergent inlet line into a container of antifreeze.
4. Start engine. Place throttle lever in Full Throttle position.
5. Squeeze trigger of trigger gun and allow water to flow from the end of the wand. Watch for antifreeze to be drawn through the detergent inlet line. Allow the antifreeze to be drawn into the system for 5 to 10 seconds.
7. Turn off water supply and disconnect water supply hose from the pump.
8. Attach a short length of hose (approximately 3 feet long) to the garden hose connector located on the pump. Install a funnel in the other end of the hose as shown in Figure 6.

9. Hold wand firmly, release the trigger of the trigger gun.
10. Start engine. Place throttle lever in the idle position.
11. Squeeze trigger on trigger gun.
12. Slowly pour antifreeze into the funnel. Continue to add antifreeze until antifreeze flows from the end of the wand.
13. Squeeze and release the trigger of the trigger gun several times to antifreeze the unloader system.
15. Squeeze the trigger of the trigger gun to relieve system pressure.

For added protection, after anti-freezing, disconnect the pressure hose from the machine and remove the coil drain plug. After coil has drained, replace pressure hose and coil drain plug. If the pressure washer is not to be used for an extended length of time, it is recommended that the system be flushed with antifreeze for rust protection. Refer to the Gasoline Engine Manual for engine storage information.
MAINTENANCE

WARNING: Unauthorized machine modification or use of non-approved replacement parts may cause personal injury and/or property damage and will void the manufacturer warranty.

Pump
Lubrication: To lubricate pump, use 30W non-detergent oil for pump crankcase. Crankcase must be filled to center of red dot on oil gauge found on the end of the pump, refer to Figure 7. During the break-in-period, make sure the oil is changed after the first 40 hours of operation. After that, replace oil every 3 months or 500 hours of operation, whichever comes first.

Gasoline Engine
Refer to the provided Gasoline Engine Manual for recommended maintenance.

Relief Valve
WARNING: The relief valve on this pressure washer has been factory set and sealed and is a field non-adjustable part. Tampering with the factory setting may cause personal injury and/or property damage, and will void the manufacturer warranty. For replacement parts refer to Coil Outlet Assembly.

If pressure from pump or thermal expansion should exceed safe limits, the relief valve will open, allowing high pressure to be discharged through hose to ground. Caution: Inspect relief valve annually for any obstruction.

Unloader Valve
WARNING: The unloader valve on this pressure washer has been factory set and sealed and is a field non-adjustable part. Tampering with the factory setting may cause personal injury and/or property damage, and will void the manufacturer warranty.

Burner Fuel Filter
Drain any water which has accumulated in fuel filter and clean or replace filter element as needed.

Heating Coil
Coil Descaling: In hard water areas, scale buildup within the heating coil will occur. Scale deposits will decrease the water temperature rise and may eventually clog the heating coil. Contact your local service center when descaling is needed.

Coil Desooting: Poor grades of fuel oil or inadequate combustion air will cause heavy soot buildup on the outside surface of the heating coil. These deposits will insulate the coil. This will restrict the air flow through the coil, further aggravating the soot buildup. Contact your local service center when desooting is needed.

Hour Meter
This hour meter will monitor the total hours of operation of the pressure washer to signal when routine maintenance is required.

Proper Pump Care:
- DO NOT pump acids.
- DO NOT allow pump to run dry.
- Winterize if storing in freezing temperatures, refer to Storage for details.
- Use a water softener on the water system if known to be high in mineral content.
- Use only high quality detergents and follow manufacturer’s mix recommendations.
- Flush the system with clear water immediately after using detergent solutions.
- Clean filter screen on detergent inlet line periodically.
- Flush the pressure washer system with antifreeze if storing for an extended period of time, refer to Storage for details.

### IMPORTANT

If the pressure washer demonstrates other symptoms or the corrective actions listed do not correct the problem, contact the local authorized Hotsy Service Center. The Hotsy Service Center can be identified by visiting [www.hotsy.com](http://www.hotsy.com)

---

When ordering from your dealer, please provide the following:
Model Number: 871SS.
Machine Serial Number: ________________________________
Component Part Number: ______________________________
Description: ________________________________________
HOTSY LIMITED NEW PRODUCT WARRANTY
PRESSURE WASHERS
WHAT THIS WARRANTY COVERS
All Hotsy pressure washers are warranted by Hotsy to the original purchaser to be free from defects in materials and workmanship under normal use, for the periods specified below. This Limited Warranty is subject to the exclusions shown below, is calculated from the date of the original purchase, and applies to the original components only. Any parts replaced under this warranty will assume the remainder of the part's warranty period.

SEVEN YEAR PARTS AND ONE YEAR LABOR WARRANTY:
Components manufactured by Hotsy, such as frames, handles, top and bottom wraps, float tanks, fuel tanks, belt guards, and internal components on the oil-end of HOTSY manufactured pumps. General, AR, Liberty, Comet and swash and wobble plate pumps have a one year warranty. Heating coils have a five year warranty from date of original machine purchase.

ONE YEAR PARTS AND ONE YEAR LABOR WARRANTY:
All other components, excluding normal wear items as described below, will be warranted for one year on parts and labor. Parts and labor warranty on these parts will be for one year regardless of the duration of the original component manufacturer's part warranty.

WARRANTY PROVIDED BY OTHER MANUFACTURERS:
Motors, generators, and engines, which are warranted by their respective manufacturers, are serviced through these manufacturers' local authorized service centers. Hotsy is not authorized and has no responsibility to provide warranty service for such components.

WHAT THIS WARRANTY DOES NOT COVER
This warranty does not cover the following items:
1. Normal wear items, such as nozzles, spray guns, discharge hoses, wands, quick couplers, seals, filters, gaskets, O-rings, packings, pistons, pump valve assemblies, strainers, belts, brushes, relief valves, fuses, pump protectors.
2. Damage or malfunctions resulting from accidents, abuse, modifications, alterations, incorrect installation, improper servicing, failure to follow manufacturer's maintenance instructions, or use of the equipment beyond its stated usage specifications as contained in the operator's manual.
3. Damage due to freezing, chemical deterioration, scale build up, rust, corrosion, or thermal expansion.
4. Damage to components from fluctuations in electrical or water supply.
5. Normal maintenance service, including adjustments, fuel system cleaning, and clearing of obstructions.
6. Transportation to service center, field labor charges, or freight damage.

WHAT YOU MUST DO TO OBTAIN WARRANTY SERVICE
In order to obtain warranty service on items warranted by Hotsy, you must return the product to your Authorized Hotsy Distributor, freight prepaid, with proof of purchase, within the applicable warranty period. If the product is permanently installed, you must notify your Authorized Hotsy Distributor of the defect. Your Authorized Hotsy Distributor will file a claim with Hotsy, who must subsequently verify the defect. In most cases, the part must be returned to Hotsy freight prepaid with the claim. For warranty service on components warranted by other manufacturer's, your Authorized Hotsy Distributor can help you obtain warranty service through these manufacturers' local authorized service centers.

LIMITATION OF LIABILITY
Hotsy's liability for special, incidental, or consequential damages is expressly disclaimed. In no event shall Hotsy's liability exceed the purchase price of the product in question. Hotsy makes every effort to ensure that all illustrations and specifications are correct, however, these do not imply a warranty that the product is merchantable or fit for a particular purpose, or that the product will actually conform to the illustrations and specifications. Our obligation under this warranty is expressly limited at our option to the replacement or repair at a service facility or factory designated by us, of such part or parts as inspection shall disclose to have been defective. THE WARRANTY CONTAINED HEREIN IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. Hotsy does not authorize any other party, including authorized Hotsy Distributors, to make any representation or promise on behalf of Hotsy, or to modify the terms, conditions, or limitations in any way. It is the buyer's responsibility to ensure that the installation and use of Hotsy products conforms to local codes. While Hotsy attempts to assure that its products meet national codes, it cannot be responsible for how the customer chooses to use or install the product. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.
